DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 08/05/2010, have been fully considered and are persuasive. The rejection has been withdrawn.

Election/Restrictions

2. Claims 1, 7, 13, 18, 32 and 35-37 are allowable. The restriction requirement as set forth in the Office action mailed on 04/15/2010, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

Claims 6, 12 and 33, are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

4. This application is in condition for allowance except for the presence of claims directed to species non-elected without traverse. Accordingly, claims 2-5, 8-11, 14-17, 19-31 and 34 have been cancelled.

Allowable Subject Matter

5. Claims 1, 6-7, 12-13, 18, 32-33 and 35-37 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: none of the references either singularly or in combination teach or fairly suggest an image forming device comprising: a transporting unit for transporting a document sheet by sheet to a specified reading position; a document judgment unit for judging whether the document transported by said transporting unit is an electronically tagged printed matter that includes an electronic tag storing original image data; a printing paper judgment unit for judging whether there is an instruction for printing the original image data on an electronically tagged printing paper equipped with an electronic tag; a reading unit for reading the original image data from the electronic tag of the document which is judged as said electronically tagged printing matter by said document judgment unit, when said printing paper judgment unit judges that there is an instruction for

printing on an electronically tagged printing paper equipped with a electronic tag; and a printing unit for printing the original image data on an electronically tagged printing paper equipped with an electronic tag, wherein the original image data is read by said reading unit, wherein said printing unit issues a blank paper as an output, when a document is judged not as an electronically tagged matter by said document judgment unit while said printing paper judgment unit judges that there is an instruction for printing on a printing paper equipped with a electronic tag. Therefore these limitations are allowable.
